Summary

As a self-taught Fullstack Developer with a strong emphasis on backend technologies, I bring four years of hands-on experience to the table. Proficient in a wide array of programming languages, including PHP, HTML, CSS, JavaScript, Node.js, Vue.js, and React.js, my primary focus has been on utilizing PHP to craft robust backend solutions.

My expertise extends to backend frameworks, with Laravel being my go-to tool for developing scalable and efficient systems. While I have ventured into Express for Node.js, my experience with it is still growing. In addition to my backend specialization, I possess versatile skills in WordPress development.

What sets me apart is my journey of self-directed learning—I have acquired my knowledge and skills through hands-on experience and a passion for continuous improvement. This unique approach has equipped me with a practical and adaptive skill set, allowing me to tackle challenges and contribute effectively to innovative projects.

I am excited to leverage my comprehensive skill set and practical experience in a Fullstack Developer role, bringing a unique perspective and a dedication to continuous learning
